

PETRA

GRADO IV

**PRODUCTO CERTIFICADO
GRADO IV
UNE EN 1143:2012**

Pastilla homologada para anclaje de cajas fuertes y cajeros automáticos

Homologada resistencia al anclaje de más de 2.000 kilogramos conforme **UNE 108136 y O.M. 317/2011**

FAC ha desarrollado una completa gama de Cajas Fuertes para cubrir todas las necesidades existentes en el mercado.

Las Cajas Fuertes PETRA están diseñadas bajo las mayores exigencias de seguridad, que confieren una reducción de peso frente a las Cajas Fuertes tradicionales, incrementando el número de barreras y defensas en su estructura, para garantizar el nivel de seguridad requerido.

Características Generales

- Cierre mediante pestillos laterales, superior e inferior, comandados por expansivo multipunto y bloqueado por dos cerraduras y sistema de rebloqueo en caso de ataque a las mismas.
- Bisagras regulables en altura con casquillos auto-lubricantes que permiten la apertura de la hoja 180°.
- La Caja Fuerte está dotada de orificio para su anclaje a suelo. Los estantes son graduables en altura sobre cremalleras con efecto antivuelco.
- Acabado en base a doble capa de imprimación antioxidante y pintura epoxy texturada de gran resistencia.
- Homologada por Laboratorio Oficial Applus, según Norma Europea UNE EN 1143-1:2012
- Producto Certificado AENOR
- Marco de Puerta Reforzado con Protecciones Anti-cuña
- Pestillería comandada por Maneta, desplazando Pestillos cromados de Acero, lateral, superior e inferiormente, disponiendo en el lado de bisagras de Sistema Anti-Extracción y Anti-cuña.
- El bloqueo de la pestillería se consigue mediante la actuación, independiente, de dos cerraduras de llave y combinación con retardo incorporado, ambas clasificadas, Tipo B EN-1300, o Clase II VDS.
